

DRNet®/Unified for HPE Customers

Satisfies today's business requirement for a single-source solution meeting all their data needs.

DRNet®/Unified for HPE Customers is your complete solution to all your data replication needs. Whether it's a need to replicate for business continuity, feed a data warehouse and enrich a data lake or integrate with a data fabric ingesting data for better analytics, NTI delivers it all with the one product.

DRNet®/Unified for HPE Customers introduces one model, one technology, one product providing a unified single-source solution supported directly by NTI sales and support.

Product Description:

DRNet®/Unified for HPE Customers: continuing to turn data into information and information into opportunity for better business insight. Whether the business need is to replicate for data protection with disaster avoidance, or to replicate data created on NonStop to open platforms and databases, or simply to deliver mission critical data in real time to processes where comprehensive data analytics is to be performed, NTI has turned its messaging into a product with DRNet®/Unified for HPE Customers.

One solution, one vendor, only ever one call to make! Check! NTI delivers and has a history of delivering such a solution to NonStop users and now customers new to NTI can have it all too-no other products required!

A combination of DRNet®/Core, DRNet®/Open and DRNet®/Vision, NonStop customers will have it all!

- ✔ Continue with traditional data replication for business continuity
- ✔ Distribute data to Oracle or DB2, whether in the cloud or on the edge
- ✔ Integrate your data with Kafka, Splunk, ELK and more
- ✔ Addition of data transformation when pursuing integration

Features:

- Re-energizing the way NonStop users approach the movement of data created on NonStop to other NonStop systems, traditional or virtual, to any JDBC accessible databases as well as to any message queues, business intelligent product offerings or data warehouse and data fabric consumers leveraging JSON messaging.
- All-in-one solution for disaster avoidance through replication, for ensuring all enterprise solutions on open systems have access to NonStop data and for adding value to enterprise critical business analytics.
- Forming the foundation for a growing ecosystem of partners to build upon and enhance to better meet the needs of all enterprises as they protect and then deliver fresh data in this new age of insight.

Benefits:

- Capitalizing on Change Data Capture (CDC) methodology that has been time-tested and then replication approach to the movement of data, no matter its destination.
- Any NonStop audited or unaudited database or file is fully supported.
- One product, one solution one point of contact for access to the complete NTI product line: NTI steps up to ensure NonStop users can replicate their data everywhere.
- One product development team and one product support team ensuring prompt turnaround of all feature enhancements and service requests.

DRNet®/Unified

PROVisioning: Excellence in Data

NTI focus is on NonStop data, your data: NTI excels with its professional provisioning exhibiting excellence in all aspects of data movement.

NTI attention is on preserving integrity, your data safety: NTI ensures back up of the critical data for more meaningful business insights takes place continuously in real time. When deploying data replication solutions, mitigating risks mandates operating from a safe haven.

Enterprises value NTI and its history, access, value, experience and its ability to navigate every route taken by data created on NonStop. With direct sales and support engagement, NTI not only makes certain a simplified line of sight is maintained and in so doing, provides the lowest Total Cost of Ownership (TCO).

Replicated
for Business Continuity

Integrated
for Business Insight

Distributed
for Business Cooperation

Transformed
for Business Opportunity

When it comes to deploying data replication, mitigate all migration risks working out of a safe HAVEN.

Considering migrating away from existing solutions on NonStop? Reduce your risk and trust the NonStop partner with a long-standing tradition of supporting NonStop customers.

There are five important components to consider that differentiate NTI from all competitors:

H FOR HISTORY

NTI pioneered Change Data Capture (CDC) technology for NonStop over three decades ago
- the least intrusive, lightest footprint and best performance

A FOR ACCESS

Talk directly with NTI
- only replication solutions vendor with direct sales and support for HPE NonStop

V FOR VALUE

Fully integrated enterprise replication solution on NonStop
- one stop shopping; no additional products required

E FOR EXPERIENCE

Most comprehensive replacement product suite, lowest investment option, leveraging real-world experience
-best alternative to poorly support product offering lacking verifiable roadmap

N FOR NAVIGATE

Ease of networking, connecting with Databases, Business Intelligence, Data Warehouses,
-industry-standard integration via JDBC access calls and JSON messaging
